Atmadinata Aviantara was born in Padang on November 4, 1997, and is a dedicated academic in the field of fisheries. He is currently a lecturer in the Aquatic Resources Management Program at the Faculty of Agriculture, Universitas Sumatera Utara. His educational background includes a Bachelor's degree (S1) in Aquaculture from Dharmawangsa University and a Master of Applied Science (S2) in Fisheries Resource Utilization from the Polytechnic of Fisheries Business. His area of expertise lies in the technical aspects of aquaculture.

*His dedication to the development of alternative feeds is also reflected in his research and scientific publications. Specifically, his research focuses on the exploration and utilization of natural fish feeds, particularly *Daphnia* sp. and black soldier fly (BSF) maggots, to identify the most optimal and economical nutritional formulations to support the growth of farmed fish.*
