My Name Is Sukmawati Utami graduated From Bogor Agricultural Development Polytechnic with Bachelor's degree and Graduated From Diponegoro University with Master's Degree in Animal Science, Highly motivated and detail oriented animal science Professional, specializing in agricultural economics. Proficient in Economic analysis, policy development, and community engagement. Seeking opportunities to contribute to sustainable agricultural development. I was active in Student activity unit in the academic field, especially in the fields of scientific writing and debates, and joined several campus student organizations.

I have Several internship and work experience in animal husbandry, both in government agencies, smallholders farms and large industrial scales. Namely in Operational staff in BPPTU Jatiwangi, Operational staff in Feed mill and Feed loot Australian Beef by PT Estika Tata Tiara Tbk (Kibif Group), and internship activities in smallholder dairy farming. Apart from internship activities, I have several professional certificates including, hatchery foreman, broiler supervisor, feed formulator, and broiler farm operator from LSP-PI part of BNSP. I have work experience as a Marketing Administrator in Taman Edukasi Satwa dan Peternakan Satoloka Jogja focusing on dairy goat farming and milk processing.

While completing my master's studies, I joined as a Field Reserecher Assistant for the Undip team which collaborated with several universities in Australia on a collaborative project, namely Indodiary 2. This project was a social project that focused on the development and construction of dairy cooperatives in Indonesia. This project started by conducting a literature review regarding the condition of cooperatives, holding public discussions between breeders, cooperatives and various livestock policy stakeholders in Central Java, conducting cooperative surveys through PRA activities, analyzing data to recommending interventions and policies for cooperatives and the Central Java government.

I Have an interest in working in the field animal husbandry in particular, as a data analysis, sales, marketing, community development as field extension agent and office administration. Let's connect and share knowledge in sustainable agricultural farming development.

That with experience, education and high dedication in this field of animal husbandry, I can develop myself and get the opportunity to work and be more useful to the community.
