Triwanto Nababan was born on January 31, 1998. He is a lecturer in the Agrotechnology Program at the Faculty of Agriculture, Universitas Sumatera Utara. He completed his master's degree at the Universitas Sumatera Utara, specializing in plant pathology. As a young academic, he is actively conducting research focused on plant diseases, particularly regarding the mapping of disease spread and the development of sustainable biological control strategies. His dedication to the field of plant pathology is reflected in various research activities and scientific publications that contribute to the advancement of plant protection science and the implementation of environmentally friendly disease control methods.
